

Roc Solid On Demand Playset Preparation Book

FOR HOSPITAL USAGE

Our new playset program is called Roc Solid On Demand – aka “ROD” – and it allows the community to build hope for families fighting pediatric cancer.

How does it work? We have simplified the process so it can be shipped directly to any family, no matter where they live ... no strings attached!

What’s in the preparation book?

A simple explanation of Roc Solid On Demand, what’s included in a ROD project and a hyperlink to our ROD webpage – which guides families on how to get their communities behind them to help build the playset.

What’s included in a ROD project?

ROD includes the playset (shipped directly to the family), access to our ROD Portal that contains all our tips and tricks, and a Play Kit with fun swag and other goodies for the family and their community.

What is the role of the hospital in the ROD process?

We know you guys are busy, so we’ve kept it very simple. When talking to a family who might be a candidate for a playset, use the preparation book to inform them about Roc Solid On Demand. It includes a hyperlink to our ROD webpage where families can learn more and apply for a playset. It is our hope that each family will have a go-to person – a host of sorts – that will help coordinate the logistics of the ROD playset build. We encourage them to think about who in their community has said, “What can I do to help?”

Who can apply for a ROD playset?

A family can apply directly for a ROD playset using the hyperlink, or if they have a “host” in mind, that person can complete the application.

What happens when the ROD process is started?

That’s where we take over! Once a family or a host has completed the application, a Roc Solid team member will be in touch to walk that person through everything they need to know.

Roc Solid Foundation is best known for surprising kids fighting cancer with brand new playsets in their backyards. Traditionally, we’ve built playsets in Virginia, North Carolina and South Carolina. But, we recognize the power of play, and we have figured out a way to do more.
